

ROI: Safety, Compliance, and Efficiency

Labor Cost Savings

Before Rhazdrugs: Hospitals managing hazardous drug lists manually spend hundreds of hours each year performing risk assessments, creating safety data sheets, and updating information in the EHR, costing about \$73,170 annually (813 hours at \$90/hour).

With Rhazdrugs: Automation and centralized updates cut the process to 144 hours annually at \$12,960.

ROI: 83% time saved | \$60,210 annual savings — freeing pharmacists for clinical tasks.

Avoided Workers' Compensation Claims

Before Rhazdrugs: Hazardous drug exposure can lead to dermatitis, asthma, reproductive harm, or cancer—each with human and financial costs.

With Rhazdrugs: Consistent, up-to-date handling instructions reduce exposure risk for pharmacy, nursing, and EVS teams.

ROI: Minor exposure claims: \$15K–\$25K
Moderate: \$40K–\$60K | Catastrophic: \$150K–\$500K+

Operational Efficiency

Before Rhazdrugs: Updating hazardous drug categories requires repetitive IT tickets and manual changes across EHR systems.

With Rhazdrugs: A single, centralized database eliminates duplication, ensuring all users see the same information.

ROI: Saves over \$25,000 annually in productivity.

Compliance Penalties

Before Rhazdrugs: Outdated lists risk fines from OSHA, CMS, and state agencies.

With Rhazdrugs: Real-time updates ensure USP <800> and NIOSH 2024 compliance, mitigating reputational and financial risk.

ROI: Avoided Fines of \$50,000+

Employee Safety & Turnover

Before Rhazdrugs: Unclear handling guidance increases stress and turnover; replacing a nurse costs up to \$40,000.

With Rhazdrugs: Clear instructions improve confidence and retention, reducing turnover by 50%.

ROI: \$60,000 annual savings.

Client Success & ROI Summary

Client Testimonials

"All the information's at my fingertips — it's so much quicker. I don't have to go digging around in multiple places. I click on it, I educate myself if there are any changes, and then I move forward. It's really time-saving." - **Infusion Nurse**

"We had a Joint Commission inspection 2 weeks after we went live with our Rhazdrugs site. When they asked a staff pharmacist where to find out hazardous drug list, he sat him in front of the computer. Joint Commission called it a 'best practice.'" - **Medication Safety Officer**

"We were able to consolidate multiple policies into one overarching hazardous drug handling policy. The software let us clean up redundant documents and make it all more consistent and accessible." - **Medication Safety and Quality Pharmacist Specialist**

Your Bottom Line

Labor Cost Savings	\$60,210 annually
Avoided Workers' Comp Claims	\$15K–\$500K+ per claim avoided
Compliance Penalty Avoidance	\$50,000+
Employee Safety & Turnover Reduction	\$60,000 annually
Efficiency Gains in IT & EHR	\$8,700 annually
Avoided Workflow Disruptions	\$18,000 annually

Labor, IT, turnover, and workflow represent recurring annual savings. Compliance penalties and workers' compensation claims represent per-event avoided costs, which can exceed the annual cost of Rhazdrugs many times over.
